

PACIFIC RIDGE ANNOUNCES COMMENCEMENT OF DRILLING AT SPIUS

Vancouver, B.C. – June 5, 2019 - Pacific Ridge Exploration Ltd. (TSX Venture: PEX) ("Pacific Ridge" or the "Company") reports that drilling has commenced on its Spius copper porphyry prospect located 40 km southwest of Merritt, British Columbia. The program will consist of four to six holes and is being conducted by Paycore Enterprises Ltd. of Valemount, B.C. The drilling will target copper soil anomalies that correlate with zones of enhanced IP chargeability with high resistivity.

The Spius property was explored for its porphyry potential in the 1960's and early 1970's. Exploration focused on a gossan area where work included an IP survey, trenching and 27 percussion and core drill holes. The drilling was shallow, with none of the drill holes exceeding 100 m. Drill logs and assay results have been lost. However, a 1969 assessment report noted that hole 2, of a 5-hole drill program, ended in 8 feet (191 to 199 ft.) of 0.4% Cu. This hole is located on the inner edge of the interpreted pyrite halo and on the edge of the copper soil anomaly. Two recently collected float samples of porphyry style mineralization with disseminated pyrite and chalcopyrite assayed 2.53% Cu and 1.43% Cu. The Company believes that the original gossan area and IP anomaly are the pyritic halo to a potential core copper zone, as reflected by the soil copper anomaly and mineralized float.

Soil geochemical surveys at Spius over the past several years have defined a central copper soil anomaly, 900 m by 750 m and open to the south, ranging from 100 ppm to plus 4,000 ppm Cu. The IP survey confirmed and expanded an earlier survey from the 1960's, providing greater detail and depth penetration and defining a horseshoe-shaped, high chargeability anomaly that envelopes the copper soil anomaly. The chargeability anomaly is believed to represent the pyritic halo of a porphyry copper system, surrounding a copper mineralized shell or core zone. The copper zone drill target is defined by the high copper in soils and supported by underlying zones of moderate chargeability and high resistivity.

About Pacific Ridge

Pacific Ridge has assembled a portfolio of highly-prospective gold and base metal projects located in the Yukon and British Columbia, where its board and management team have a track record of success. Its holdings include the Mariposa, Eureka Dome and Gold Cap gold exploration projects in the Klondike-White Gold District, Fyre Lake in the Finlayson District and Spius Cu-Mo-Au porphyry in southern British Columbia.

On behalf of the Board of Directors,

The technical information contained within this News Release has been reviewed and approved by Gerald G. Carlson, Ph.D., P.Eng., President and CEO of Pacific Ridge and Qualified Person as defined by National Instrument 43-101 policy.

Forward-Looking Information: This release includes certain statements that may be deemed "forward-looking statements". All statements in this release, other than statements of historical facts, that address exploration drilling and other activities and events or developments that Pacific Ridge Exploration Ltd. ("Pacific Ridge") expects to occur, are forward-looking statements. Forward-looking statements in this news release include statements regarding the exercise of the options and future exploration plans and expenditures. Although Pacific Ridge believes the expectations expressed in such forward-looking statements are based on reasonable assumptions, such statements are not guarantees of future performance and actual results or developments may differ materially from those forward-looking statements. Factors that could cause actual results to differ materially from those in forward looking statements include market prices, exploration successes, and continued availability of capital and financing and general economic, market or business conditions. These statements are based on a number of assumptions including, among other things, assumptions regarding general business and economic conditions, that one of the options will be exercised, the ability of Pacific Ridge and other parties to satisfy stock exchange and other regulatory requirements in a timely manner, the availability of financing for Pacific Ridge's proposed programs on reasonable terms, and the ability of third party service providers to deliver services in a timely manner. Investors are cautioned that any such statements are not guarantees of future performance and actual results or developments may differ materially from those projected in the forward-looking statements. Pacific Ridge does not assume any obligation to update or revise its forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.
